Specific Plan Preparation Cost Recovery and Update Fee		Fee = A { [M (1 + bn)] + [U (1+b5)] } Where: A = Number of gross acres in the project area; M = The City's average cost per gross acre of preparing the Specific Plan and the MEIR and completing any City-initiated annexation of the property. The final amount will be set at the time of final recordation of the City-initiated annexation. Where a privately initiated annexation precedes a City-sponsored annexation (if any), the fee will be determined based on the average cost per acre, as describe above, without the annexation costs; b = The projected annual inflation rate. The average annual inflation rate used for this calculation will be based on the average inflation rate for the previous 5 years as measured by the consumer price index. The rate will be revised each year at the time of the required annual report on the Specific Plan; n = Number of years since the year of Specific Plan adoption; U = Contribution towards cost of necessary updates to the Specific Plan and accompanying Master Environmental Impact Report.
