

## Appendix D

### Infrastructure Improvements - Preliminary Costs

---

The following table and map exhibit illustrates the neighborhood locations lacking standard public amenities such as curb; gutter; sidewalk; ADA handicapped curb cuts at street corners; street pavement; street lighting; and improved transit facilities. The preliminary cost estimate should be considered a rough estimate only of potential costs necessary to provide the needed amenities. The cost figures are based on an average cost for the specific type of improvement. No engineering work has been completed at any of the locations.
